DETAILED ACTION

Response to Preamendments

Applicant's preliminary amendment filed on 10/29/2003 has been considered and entered.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The claims are directed to analog to digital converter while the title is high speed digital to analog converter. Since the application is in allowance condition, a new title is required in response to this office action.

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

Claims 25-38 are allowable.

The following is an examiner's statement of reasons for allowance: Claims 25-38 are allowed over the prior art of record. The prior art fails to teach or suggest a method and an apparatus for high speed analog to digital converter that implement a plurality of analog to digital cells and each cell is converting one of a series of analog signal to corresponding one of a series of digital signals and a control circuit for controlling the plurality of analog to digital cells so that each cell is assigned at a different time to

convert a different one of each successive analog signal from the series of analog signal to a corresponding digital signals in the series of digital signals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Cited References

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references relate to method and device of high speed analog to digital converters.
